

Isover Intense

Slabs of hydrophilic mineral wool

TECHNICAL SPECIFICATION

Slabs of hydrophilic mineral wool are made of a mixture of igneous rocks (basalt, diabase, etc.), which melts at high temperatures, tears to fibres and the individual fibres are bonded to one another by a binder. Hydrophobizing oils are not added to this type of mineral wool, unlike building insulation. Therefore, the material holds water very well and creates a suitable environment for plant growth.

APPLICATION

Isover Intense are reinforced hydroaccumulation boards that are used as the bottom hydroaccumulation layer of intensive roof systems. They can also be used as a reinforcing layer above the Isover Flora boards in places where the roof is in more frequent use. Thanks to the increased power of hydroaccumulation, these boards can also be applied to sloping green roofs.

BENEFITS

- Increased strength allowing more frequent foot traffic.
- Excellent hydro-accumulative properties.
- Good heat-insulating effect even if wet.
- Health, environmentally friendly and recyclable.

PACKAGING, TRANSPORT, WAREHOUSING

Isover Intense slabs are packed in PE foil. The slabs have to be transported in covered vehicles under conditions preventing their excessive wetting or other degradation. They should be stored flat in sheltered dry premises, up to the maximum layer height of 2 m.

DIMENSIONS AND PACKAGING

Thickness [mm]	Length x width [mm]	Volume per package			Quantity per palette	
		[pcs]	[m ²]	[m ³]	[m ²]	[m ³]
50	1000 × 600	5	3.0	0.15	30.0	1.50
100	1000 × 600	3	1.8	0.18	14.4	1.44

TECHNICAL PARAMETERS

Parameter	Unit	Methodology	Value
Thermal technical properties			
Thermal conductivity coefficient at dry state λ_d	[W·m ⁻¹ ·K ⁻¹]	EN 12667	0.035
Thermal conductivity coefficient at max. humidity λ_{wmax} (78 % obj.)	[W·m ⁻¹ ·K ⁻¹]	EN 12664	0.355
Specific heat capacity c_d	[J·kg ⁻¹ ·K ⁻¹]	ČSN 73 0540-3	800
Mechanical properties			
Compressive stress	[kPa]	EN 826	50
Fire safety properties			
Reaction to fire class	[-]	EN 13501-1+A1	A1
Maximum temperature for use	[°C]		200
Melting temperature t_f	[°C]	DIN 4102 part 17	≥ 1000
