

Isover UNI

Stone wool insulation

TECHNICAL SPECIFICATION

Insulating slabs made of Isover mineral wool. The production is based on the defibring method of the mineral composition melt and additional additives and ingredients. The mineral fibres produced are processed into the final slab shape on the production line. The entire fibre surface is hydrophobic. The slabs in the construction should be protected suitably against the weather (outer cassette sheathing, diffusion and vapour-proof foil).

APPLICATION

Isover Uni slabs are suitable for unloaded insulation of outer walls (ventilated facades under the cladding with insulant inserted into cassettes or frames), insulation of pitched roofs, ceilings, drop ceilings and other light sandwich constructions. The material is suitable for fire protection partition walls where a density $\geq 40 \text{ kg}\cdot\text{m}^{-3}$ is required.

PACKAGING, TRANSPORT, WAREHOUSING

Isover Uni insulation slabs are packed into PE film with package height up to 0.5 m. The slabs must be transported in covered vehicles under conditions that keep them dry and prevent other damage. The products are stored indoors or outdoors depending on the conditions specified in the current Isover price list.

BENEFITS

- Very good thermal insulation performance.
- Fire resistance.
- Excellent acoustic properties in terms of noise absorption.
- Low vapour resistance – good water vapour penetrability.
- Environmentally friendly and hygienic.
- Completely hydrophobic.
- Long life span.
- Resistant to wood-destroying pests, rodents, and insects.
- Easy workability – can be cut, drilled into, etc.
- Dimensional stability during temperature change.

DIMENSIONS AND PACKAGING

Thickness [mm]	Length x width [mm]	Volume per package			Quantity per palett [m ²]	Declared thermal resistance R _d [m ² ·K·W ⁻¹]
		[pcs]	[m ²]	[m ³]		
40	1 200 x 600	12	8.64	0.35	198.72	1.10
50	1 200 x 600	10	7.20	0.36	165.60	1.40
60	1 200 x 600	8	5.76	0.35	132.48	1.70
80	1 200 x 600	6	4.32	0.35	99.36	2.25
100	1 200 x 600	5	3.60	0.36	82.80	2.85
120	1 200 x 600	4	2.88	0.35	66.24	3.40
140	1 200 x 600	3	2.16	0.30	56.16	4.00
150	1 200 x 600	3	2.16	0.33	51.84	4.25
160	1 200 x 600	3	2.16	0.35	49.68	4.55
180	1 200 x 600	2	1.44	0.26	41.76	5.10
200	1 200 x 600	2	1.44	0.29	37.44	5.70

³⁾ Value with greatest numerical tolerance.

²⁾ Value with lowest numerical tolerance.

³⁾ Declared values were set under the following conditions: (reference temperature 10°C, humidity u_{dry} reached by drying) according EN ISO 10456.

⁴⁾ Valid for typical use in construction with risk of condensation. In the case of construction without any risk of condensation, it is possible to use the declared value of thermal conductivity.

⁵⁾ According to EN ISO 14021, part 7.8 – Recycled content.

⁶⁾ In this case it is standard mixed waste.

⁷⁾ FU = functional unit (1 m² of insulation at a thickness of 100 mm thick for life cycle phases A1-A3).
