

TECHNICAL SPECIFICATION

Insulating roll made with glass wool ISOVER 4+. The mineral fibres produced are processed into the final mat shape on the production line. Made in Italy with at least 80% of recycled glass and with an exclusive, patented binder, that ensures maximum indoor air quality. The insulation is not harmful to the environment or public health, and it is resistant to moulds, fungi and wood-destroying insects.

The insulation in the construction should be properly protected (vapour-proof foil, suitable protection against dust setting in case of loosely laid insulation, additional construction layers).

APPLICATION

The fibreglass insulation mats with excellent heat-insulating properties of Isover EVO are intended for thermal and acoustic insulation of partition walls, sloping roofs, ceilings and soffits. The product is not suitable for ventilated facades and exterior heat insulations.

PACKAGING, TRANSPORT, WAREHOUSING

The insulating rolled strips Isover EVO are compressed and packed in PE foil (IMPS = 24 rolls, volume of 4.56 m³). The material is extremely compressed in the package, once unpacked it quickly attains its full thickness. The compression facilitates handling, saves storage area as well as space on the construction site. The rolls have to be transported in covered vehicles under conditions preventing their wetting or other degradation. The products are stored indoors or outdoors depending on the conditions specified in the current ISOVER price list.

BENEFITS

- fire-resistant
- very good thermal insulation performance
- excellent acoustic properties in terms of noise absorption
- low vapour resistance - good water vapour penetrability
- environmentally friendly and hygienic
- completely hydrophobic
- long life span
- resistant to wood-destroying pests, rodents, and insect
- easy workability - can be cut, drilled into, etc.
- dimensional stability during temperature change

DIMENSIONS AND PACKAGING

Thickness	[mm]	TWIN 100/50	TWIN 120/60	TWIN 160/80	100	120	140	160	180	200
Length × width	[mm]	5500 × 625	4600 × 625	3500 × 625	5500 × 1200	4600 × 1200	4000 × 1200	3500 × 1200	3200 × 1200	2800 × 1200
Volume per package	[m ³]	4	4	4	1	1	1	1	1	1
Quantity per palette	[m ²]	6.88/13.75	5.75/11.50	4.38/8.75	6.60	5.52	4.80	4.20	3.84	3.36
Declared thermal resistance R _D	[m ² ·K·W ⁻¹]	0.19	0.19	0.19	0.19	0.19	0.19	0.19	0.19	0.19
		165/330	138/276	105/210	158.40	132.48	115.20	100.80	92.16	80.64
		2.85/1.40	3.40/1.70	4.55/2.25	2.85	3.40	4.00	4.55	5.10	5.70

Note: TWIN 100/50 - two rolls per package, of identical thickness 50 mm.

TECHNICAL PARAMETERS

Parameter	Unit	Methodology	Value	Designation code				
Geometric shape								
Length <i>l</i>	[%, mm]	EN 822	±2 %					
Width <i>b</i>	[%, mm]	EN 822	±1.5 %

Specific air flow resistivity <i>r</i>	[kPa·s·m ⁻²]	Declaration according to EN 13162+A1	Level of air flow resistivity				AFr	
		Measurement according to EN 29053	≥ 5					

¹⁾ Whichever gives the greatest numerical tolerance.

²⁾ Whichever gives the smallest numerical tolerance.

³⁾ Declared values were set under the following conditions (reference temperature 10 °C, humidity *u_{dry}*, which is reached by drying) according EN ISO 10456.

⁴⁾ It is valid for typical use in construction with risk of condensation. In the case of construction without any risk of condensation it is possible to use the declared value of thermal conductivity.

⁵⁾ Informative non-declared value beyond scope of CPR, obtained by concrete tests.
