

ISOVER Super Profi

Mineral fibreglass insulation

TECHNICAL SPECIFICATION

Rolled insulation mats made of ISOVER fibreglass wool are covered with hydrophobic fibres on the entire surface. The production method is based on the fibering of glass melt and other additives and ingredients. The mineral fibres produced are processed into the final mat shape on the production line.

BENEFITS

- fire-resistant
- very good thermal insulation performance
- excellent acoustic properties in terms of noise absorption
- low vapour resistance - good water vapour penetrability
- environmentally friendly and hygienic
- completely hydrophobic
- long life span
- resistant to wood-destroying pests, rodents, and insect
- easy workability - can be cut, drilled into, etc.
- dimensional stability during temperature change

APPLICATION

The fibreglass insulation mats with excellent heat-insulating properties are used as thermal and acoustic insulation of the pitch roofs, ceilings, false ceilings, ventilated facades, timber frame construction and other light sandwich constructions.

Superior energy saving type of insulation $\lambda_0 = 0,032 \text{ W}\cdot\text{m}^{-1}\cdot\text{K}^{-1}$.

PACKAGING, TRANSPORT, WAREHOUSING

The ISOVER rolls are strongly compressed within the package and wrapped with PE foil (1 MPS = 18 Rolls for th. 100-180 mm and 24 Rolls for th. 40-80 mm, volume 4,09 m³). After unpacking, the rolls quickly acquire full thickness. Compressing makes manipulation easier and saves space in warehouses, during transport and on the construction site. Rolls have to be transported in covered vehicles under conditions preventing them from getting wet or being degraded. The products are stored indoors or outdoors depending on the conditions specified in the current ISOVER price list.

DIMENSIONS AND PACKAGING

Thickness	[mm]	40	60	80	100	120	140	160	180
Length x width	[mm]	9000 x 1200	7500 x 1200	6000 x 1200	4500 x 1200	4000 x 1200	3500 x 1200	3000 x 1200	2500 x 1200
Volume per package	[ks]	1	1	1	1	1	1	1	1
	[m ³]	10,80	9,00	7,20	5,40	4,80	4,20	3,60	3,00
Quantity per palette	[m ²]	0,43	0,54	0,58	0,54	0,58	0,59	0,58	0,54
	[m ²]	259,20	216,00	172,80	97,20	86,40	75,60	64,80	54,00
Declared thermal resistance R ₀	[m ² ·K·W ⁻¹]	1,25	1,85	2,50	3,10	3,75	4,35	5,00	5,60

TECHNICAL PARAMETERS

Parameter	Unit	Methodology	Value	Designation code
Geometric shape				
Length l	[%, mm]	ČSN EN 822	±2 %	
Width b	[%, mm]	ČSN EN 822	±1,5 %	
Thickness d	[%, mm]	ČSN EN 823	-5 % or -5 mm ¹⁾	Class of thickness tolerances T1
Deviation from squareness of the edge on length and width S _b	[mm·m ⁻¹]	ČSN EN 824	5

¹⁾ Whichever gives the greatest numerical tolerance.

²⁾ Declared values were set under the following conditions (reference temperature 10 °C, humidity u_{dry}, which is reached by drying) according EN ISO 10456.

³⁾ It is valid for typical use in construction with risk of condensation. In the case of construction without any risk of condensation it is possible to use the declared value of thermal conductivity.

⁴⁾ Informative non-declared value beyond scope of CPR, obtained by concrete tests.

⁵⁾ In this case it is standard mixed waste.

⁶⁾ FU = functional unit (1 m² of insulation by 100 mm thick for live cycle phases A1-A3).
